

Since 1965

Ashok Rubber Works

COMMITTED TO QUALITY

**Delivering Quality Sealing Solutions for Aerospace,
Hydraulic Systems, Chemical Plants & More**

INDUSTRIAL PARTNERS FOR EFFECTIVE DOWNTIME FREE OPERATIONS

58Years

1965

Founded and build a
Rubber Molding Factory

1998

Manufacturing of
Oil Seals & Molded Rubber
products in Dubai region

2013

Manufacturing of
Industrial grade plastics
and metals

2018

Expanded Operations in
Abu Dhabi region

2021

A full-fledged
manufacturing of seals
and rubber products in
conjunction with plastics
and metal at Kezad

About us

Founded in 1965, Ashok Rubber Works has grown from a local supplier into a leading Indian manufacturer and exporter of high-quality O-Rings and sealing solutions. With decades of experience, advanced technology, and a skilled team, we serve diverse industries nationwide and abroad. Our mission is simple: deliver reliable, made-in-India products that enhance efficiency and build lasting partnerships with our clients.

Accountability

We believe in delivering not just products, but trust and responsibility.

Every batch undergoes strict quality control to meet global performance standards.

Our transparent communication and on-time delivery define our commitment to clients.

OUR PRODUCTS

ELASTOMERS

Elastomers are flexible, durable polymers ideal for seals, gaskets, and vibration dampers in industrial and mechanical applications.

[VIEW PRODUCTS](#)

OUR PRODUCTS

METAL

Metals offer exceptional strength and durability, making them essential for structural and mechanical applications in industrial settings.

[VIEW PRODUCTS](#)

OUR PRODUCTS

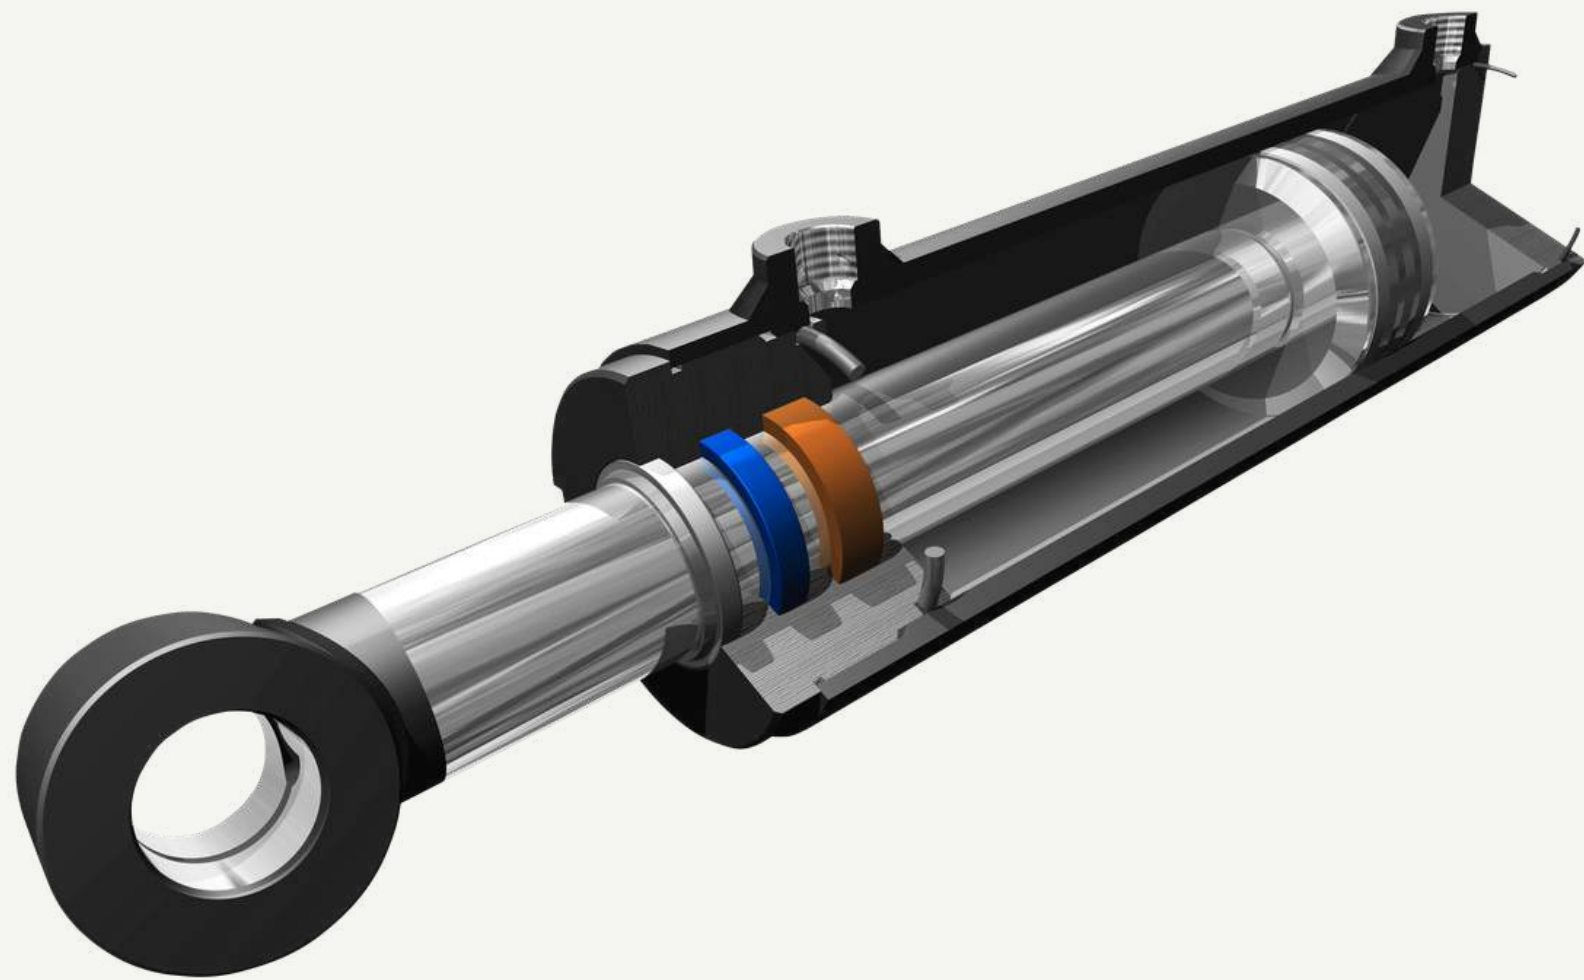

THERMOPLASTIC

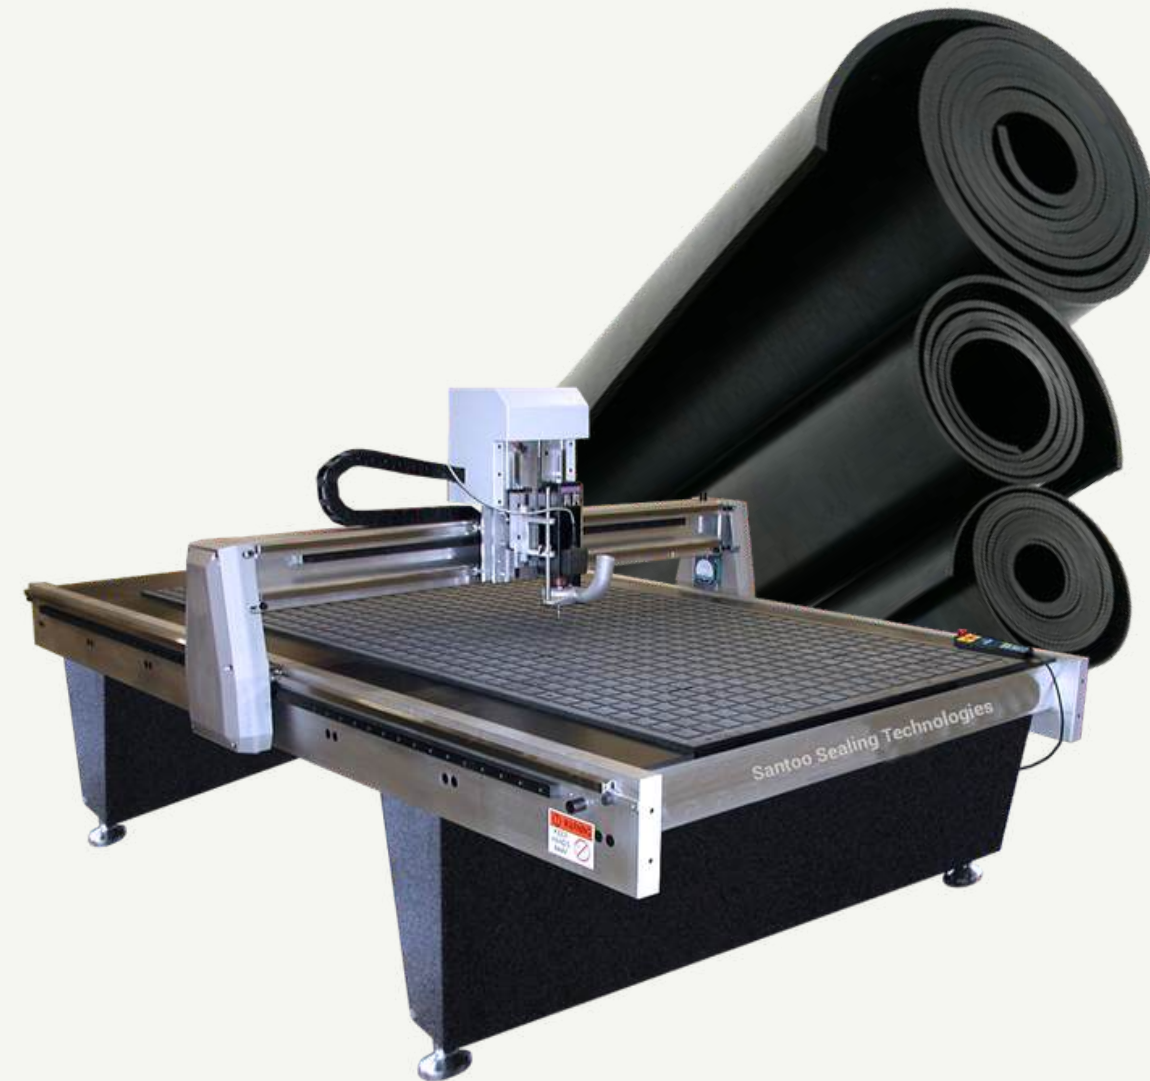

Thermoplastics are versatile, heat-resistant materials used in industrial and mechanical applications for their ease of molding and durability.

OUR SEALING PRODUCTS

O ring / X ring / V Ring

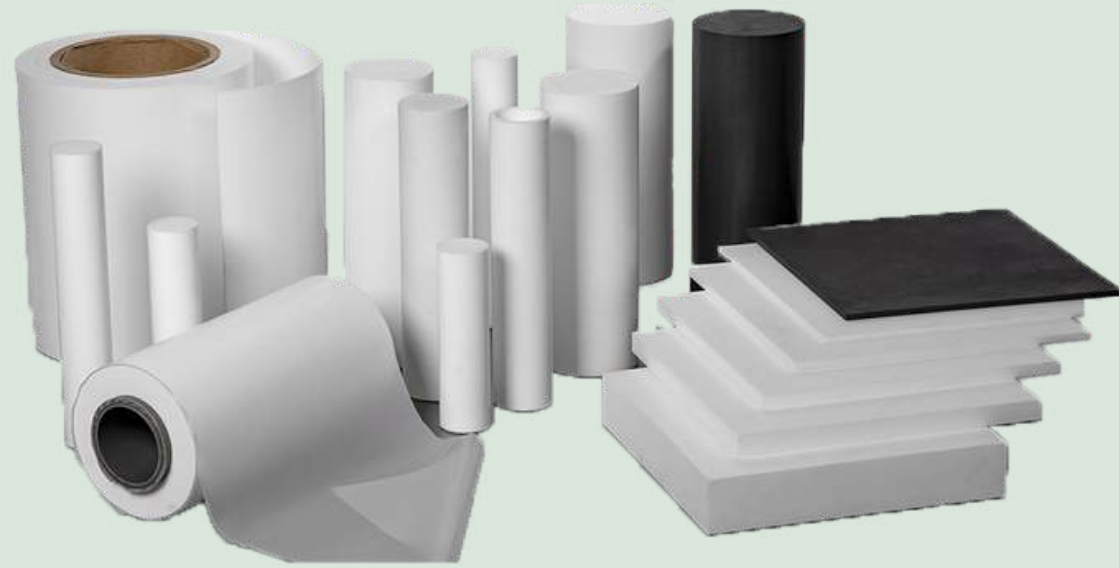

Rotary Seals

Bellows

Sealing technology encompasses various methods and materials used to create barriers that prevent leakage of fluids or gases and protect against environmental factors. It's crucial in numerous industries, including automotive, aerospace, construction, and manufacturing.

OUR SEALING PRODUCTS

**Semi- Finished
PTFE Products**

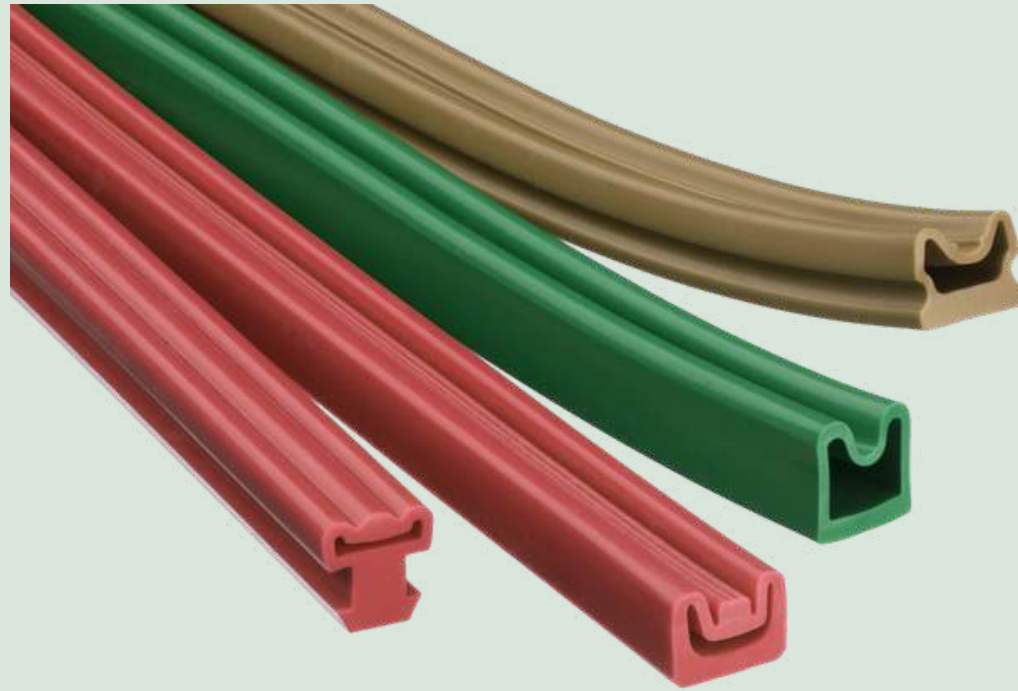

**Hydraulic & Pneumatic
Sealing Elements**

Labyrinth Seals

Sealing technology encompasses various methods and materials used to create barriers that prevent leakage of fluids or gases and protect against environmental factors. It's crucial in numerous industries, including automotive, aerospace, construction, and manufacturing.

OUR SEALING PRODUCTS

Inflatable Seals

Guiding Elements

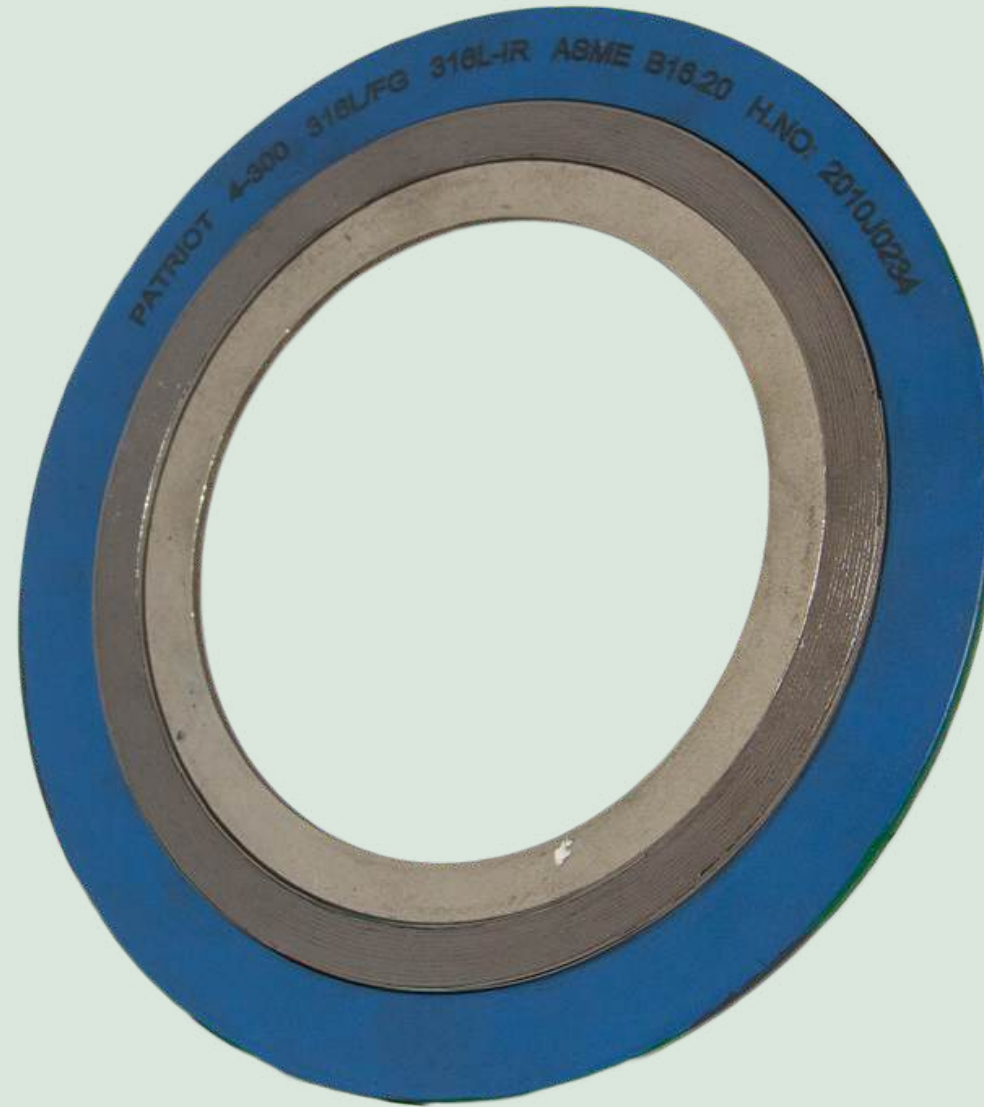

Assorted Boxes

Sealing technology encompasses various methods and materials used to create barriers that prevent leakage of fluids or gases and protect against environmental factors. It's crucial in numerous industries, including automotive, aerospace, construction, and manufacturing.

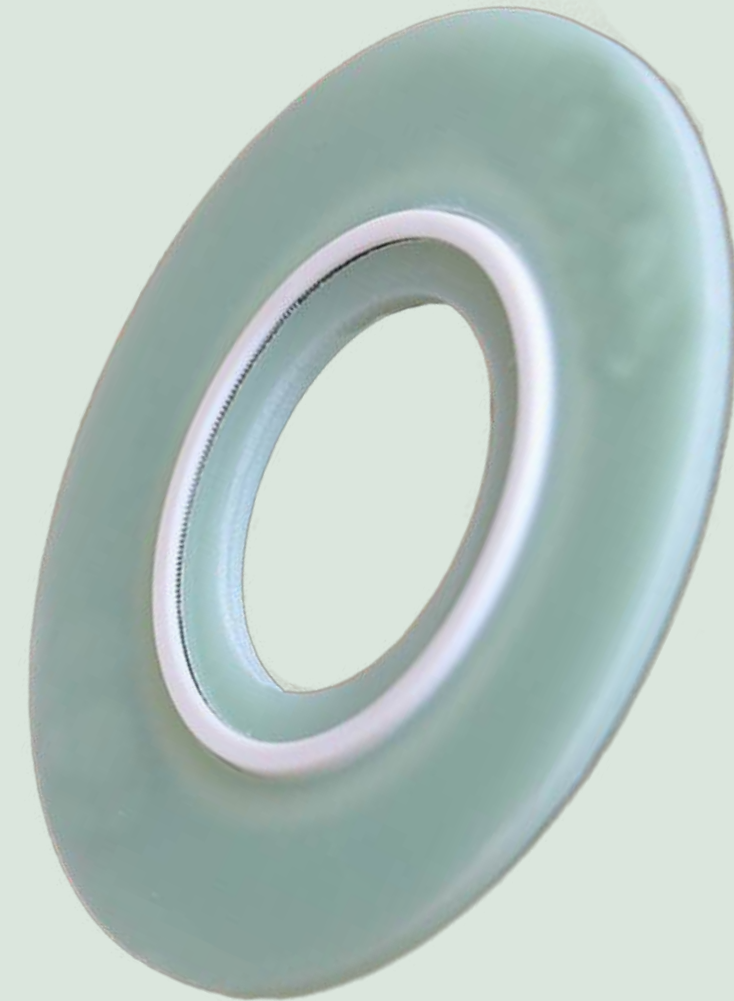

GASKETS

SWG CSOR FG SS316IR Gasket

SWG CSOR FG SS316IR

GRE G10 PTFE Spring Energized Seal

Gaskets are mechanical components designed to fill the space between two or more surfaces, creating a reliable seal that prevents leakage of fluids or gases under compression. They are essential across industries such as automotive, aerospace, oil and gas, and manufacturing, ensuring safety, efficiency, and durability in various applications.

GASKETS

SWG 316OR-FG MICA

SWG SS316OR PTFE LLR

SWG SS316IR Mica OR

Gaskets are mechanical components designed to fill the space between two or more surfaces, creating a reliable seal that prevents leakage of fluids or gases under compression. They are essential across industries such as automotive, aerospace, oil and gas, and manufacturing, ensuring safety, efficiency, and durability in various applications.

MECHANICAL SEALS

Mechanical seals are devices used to join rotating and stationary parts of machinery, preventing leakage of fluids along a rotating shaft. They are vital in pumps, compressors, mixers, and other rotating equipment, ensuring reliability, safety, and efficiency across industries such as oil and gas, chemical processing, water treatment, and power generation.

IMPELLER

Impellers are rotating components designed to transfer energy from a motor to a fluid, increasing its flow and pressure. Commonly used in pumps, compressors, and turbines, they play a crucial role in industries such as water treatment, chemical processing, power generation, and marine engineering.

GLAND PACKING

Gland packing is a sealing material, typically made of braided fibers, used to control leakage around shafts, valves, and pumps by compressing it within a stuffing box. It is widely applied in industries such as marine, power generation, chemical processing, and water treatment for reliable and cost-effective sealing solutions.

OUR METAL PRODUCTS

Timing Pulley

Coupling

Round Belt Pulleys

Metal products encompass a wide range of items made from metals such as steel, aluminum, and copper, used for construction, manufacturing, and industrial applications. They provide strength, durability, and versatility, serving essential roles in industries like automotive, aerospace, infrastructure, and machinery.

OUR METAL PRODUCTS

Universal joint

Flange coupling

Hub Ring Flange

Metal products encompass a wide range of items made from metals such as steel, aluminum, and copper, used for construction, manufacturing, and industrial applications. They provide strength, durability, and versatility, serving essential roles in industries like automotive, aerospace, infrastructure, and machinery.

OUR METAL PRODUCTS

Multi Purpose Hoses

Diaphragm Renk Coupling

Sleeve Coupling Flange

Metal products encompass a wide range of items made from metals such as steel, aluminum, and copper, used for construction, manufacturing, and industrial applications. They provide strength, durability, and versatility, serving essential roles in industries like automotive, aerospace, infrastructure, and machinery.

OUR METAL PRODUCTS

Food Grade Hoses

Chemical Hoses

Duct-Ventilation Hoses

Steam Hoses

Metal products encompass a wide range of items made from metals such as steel, aluminum, and copper, used for construction, manufacturing, and industrial applications. They provide strength, durability, and versatility, serving essential roles in industries like automotive, aerospace, infrastructure, and machinery.

OUR METAL PRODUCTS

Pneumatic actuator

Butterfly Valve

Solenoid Valve

Metal products encompass a wide range of items made from metals such as steel, aluminum, and copper, used for construction, manufacturing, and industrial applications. They provide strength, durability, and versatility, serving essential roles in industries like automotive, aerospace, infrastructure, and machinery.

OUR METAL PRODUCTS

Ball Valve

Stainless Steel Ball Valve

Actuated Valves

Metal products encompass a wide range of items made from metals such as steel, aluminum, and copper, used for construction, manufacturing, and industrial applications. They provide strength, durability, and versatility, serving essential roles in industries like automotive, aerospace, infrastructure, and machinery.

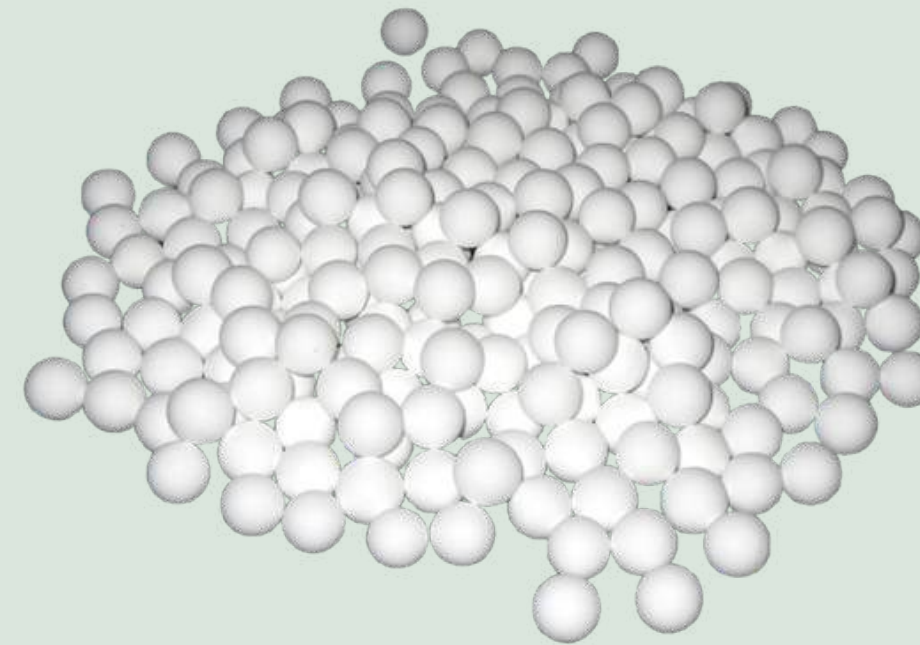

OUR METAL PRODUCTS

Glass Ball

Ferrous Metal Steel Balls

Ceramic Balls

Non-Ferrous-Metal-Steel-Balls

Metal products encompass a wide range of items made from metals such as steel, aluminum, and copper, used for construction, manufacturing, and industrial applications. They provide strength, durability, and versatility, serving essential roles in industries like automotive, aerospace, infrastructure, and machinery.

ANTI VIBRATION PRODUCTS

Leveling Machine Mounts

Insulating Plates

Insulating plates

Anti-vibration products are components designed to reduce or isolate vibration and noise in machinery and equipment, protecting both the system and its surroundings. They are widely used in industries such as automotive, manufacturing, HVAC, and construction to enhance performance, longevity, and safety.

TAPES

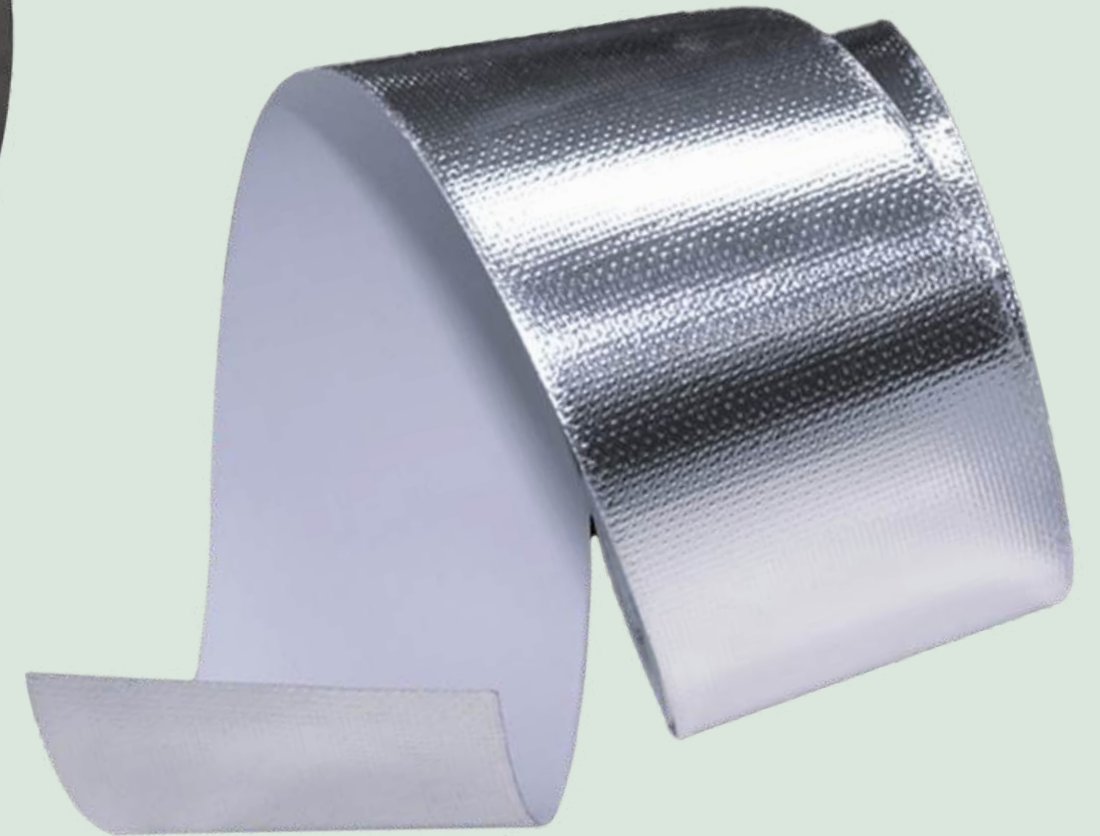

Alu-pet Tape

Red Polyester Tape

PVC Pipe Wrapping Tape

Aluglass Tape

Tapes are flexible materials with adhesive properties, used to bond, seal, insulate, or protect surfaces. They are widely applied in industries such as packaging, construction, electronics, and automotive for reliable, efficient, and versatile solutions.

TAPES

Aluminum Foil Tape

Warning Tape

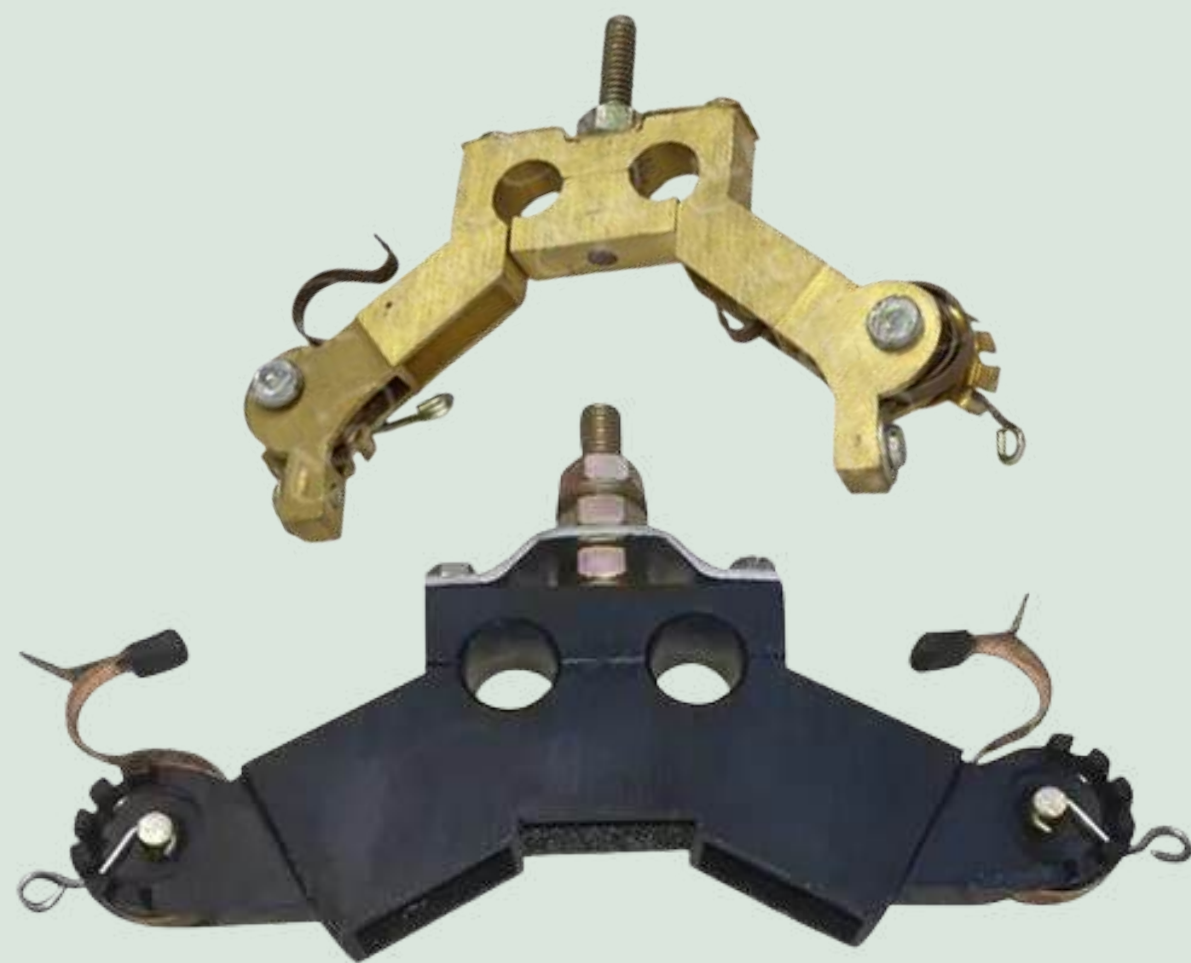

Surface Protection Tape

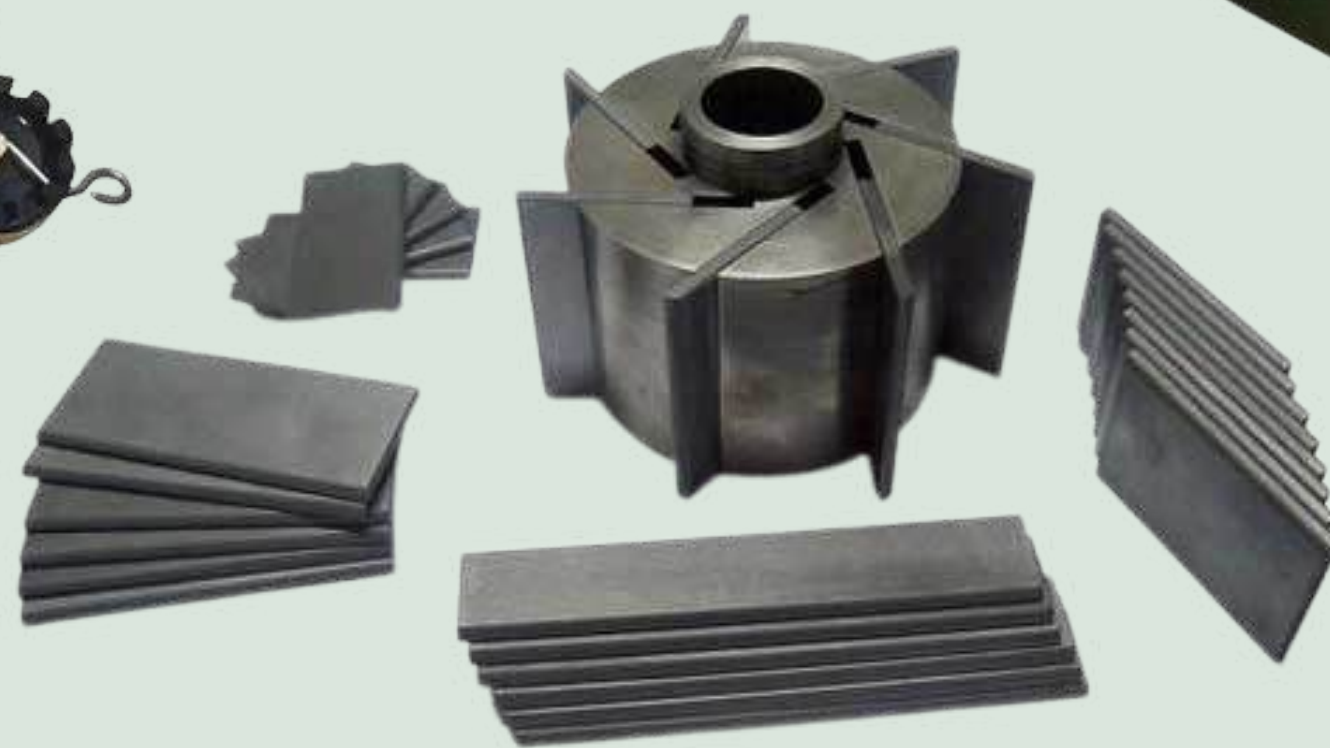

Electrical PVC Tape

Tapes are flexible materials with adhesive properties, used to bond, seal, insulate, or protect surfaces. They are widely applied in industries such as packaging, construction, electronics, and automotive for reliable, efficient, and versatile solutions.
